

Naxtor-Scan Professional

Two Solutions in one

Warehouse Management System (WMS)
Tradefair Management System (TMS)

Naxtor.WMS *One Stop Solution for Managing your Warehouse :*

Naxtor Warehouse Management System (WMS) is designed to automate your supply chain and increase productivity and increase the efficiency of warehouses of all sizes. It provides the basic functions for warehouse operations that include order management, barcode allocation, receiving, stocking, replenishment, picking, shipping as well as management features; queries and reporting.

Naxtor.TMS *Take Sales orders remotely - Mobilize your Workforce:*

Naxtor Tradefair Management System (TMS) is a mobile ordering system designed to capture orders anywhere, anytime, on-the-road or at fairs efficiently on the handheld computer (PDA's) giving you the competitive edge through effective and efficient sales management.

Naxtor.WMS Warehouse Management System

Naxtor.WMS is the solution to the everyday mistakes and inefficiencies that have a direct effect on profits.
